- Three Part Webinar Series -

The Problem with Behavior Problems: Supporting Students & Addressing Challenges in Inclusive Schools

Presented by Dr. Paula Kluth

October 24

November 2

November 9

All webinars will be held at 3:00-5:00 PT/4:00-6:00 MT

Session I: Understanding Behavior & Understanding Students

This session will explore fresh ways to think about "behavior problems" in inclusive schools; where problems come from, who "owns" them, and how language and approaches can create and minimize behavior struggles. Paula will also focus on the question, "Is your support supportive?" and provide suggestions for evaluating the way we approach the work of "managing" behavior.

REGISTER FOR SESSION I: <http://tinyurl.com/yaz9vskr>

Session II: Disability-Related Struggles

This session will focus on the difficulties students may have with communication, perception, movements, and actions; as well as the role sensory problems and movement differences play in a student's ability to learn, engage with others, and function in the learning environment.

Session III: Practical Strategies for the Classroom & Beyond

The final session will explore ten supports and strategies that can be used across environments and grade levels, including positive choices, video modeling, strengths-based curriculum mapping, exercise, social narratives, and safe space.
